DENTAL HISTORY

Admitting Diagnosis: Acute Stress Reaction ICD-9-CM #308 0

INDICATION FOR PROCEDURE

- This patient has severe caries and is in need of extensive dental work.
- General anesthesia is necessary to complete the required dental treatment. Control of apprehension and pain in this patient is not responsive to office standard procedures.
- To insure quality care and safety, it is necessary to perform the dental procedures under general anesthesia.
- If left untreated, complications could be severe and hospitalization required. In order to avoid any life threatening situations, this is the recommended option and mode of treatment.
